## Human Sex Trafficking in Wisconsin

Wednesday, November 15 | 6:30 PM  
Menomonee Falls Public Library

The greater Milwaukee area has been tagged repeatedly by the FBI as among the top cities for human sex trafficking in the nation, yet residents tend to believe it doesn't occur here. This state of denial affects the quality of help offered to survivors, policy development and implementation of laws, and the education young people receive about the risks. Guest speaker Rachel Monaco-Wilcox outlines the prevalence of trafficking here and proposes ways citizens can make a difference.
